- Education
- School Projects
- Contact

About me

I'm Win Hnin Hlaing, a multidisciplinary creative with a passion for networking and web development. My journey began with a sketchpad and a curiosity for how we use programming languages to communicate with computer, and how databases store, manipulate, and share the information –and it's grown into a career devoted to meaningful, impactful creative work.

I am a puzzle lover and I love solving logical problem. Our mission in courses is to design online webpages and to build certain apps for a lot of users . Every project is an opportunity to develop my logical problem-solving skills and to improve my creativity.

Education

University of Computer Science and Technology
Undergraduate (Computer Science)

Courses

- Object Oriented Programming
- HTML
- Database Fundamental
- Digital Logic and design

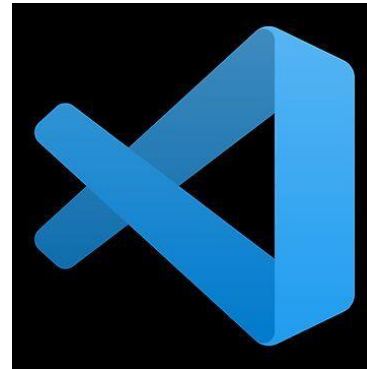

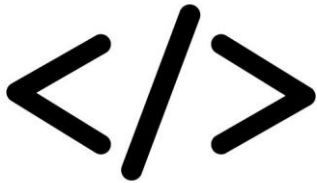

Skills

Programming: C++, HTML, CSS (first year of computer science and technology)

Databases: MySQL

Tools: VS Code, NotePad, CodeBlocks, MySQL,
Multisim 11.0

School Projects

Online Learning Classes(HTML group project)

- Designed a webpage for the online language classes.
- Included pages i.e., Home, Enroll Now, About Us, Sign Up, Help. .
-

C++

- Array and String
- C++ using structure
- C++ using Function
- C++ using Pointer
- File

Databases

- Databases for customers, sales and products.
- Relational Algebra
- Normalization
